

Anti-Litter Messages

1-

A few pieces of litter along the roadside may not seem like a crime, but it is..... Littered roadways and public places cost lots of money to clean up and aside from clean up costs, littering also endangers the health of humans and animals alike.

The next time you think about littering....think about the cost.

2-

College student : The effects of littering has always been something I overlooked, now on attachment at GSWMA I have come to realize that there is more to littering than simply dropping at item on the ground.

It degrades the environment, creates public health problems,it is offensive, bears many social and environmental costs and also degrades the person who commits the act.

Join our fight against litter.

A clean environment is for all of us to enjoy.

A cleaner Grenada.... we are in it together.

3-

This time of year is normally characterized by the staging of various activities leading up to Carnival celebrations, but along with those activities also come the increased amounts of litter in our streets and drains.

This year we have installed a number of litter bins around towns on the island to help us to better manage our litter.

As we go about this festive season, let us do it with the environment in mind, make use of available bins to dispose of litter and make our island a cleaner, better place.

4-

Litter is everyone's problem but you can be the solution.....litter happens one piece at a time - one candy wrapper, one used napkin, one beverage bottle, one soft drink can – the loads of litter we see on side walks, drains and unused pieces of property are not dumped there all at once, they all got there one piece at a time.

And although there are many street cleaners and other concerned groups who clean up our litter, the unsightly evidence of littering still appears. The answer is getting everyone to realize that one piece of waste properly disposed, is one less piece of waste that becomes litter.

This festive season use the bin.

5-This festive season we are asking all activity organizers to make provision for proper waste disposal. Ensure that you have a proper plan put in place to clean up areas where the activities are held and also ensure that you encourage persons to dispose of their waste properly.

Vendors are to ensure that they provide appropriate receptacles for the collection of waste after vending
